

WORKSHOP OPTIONS

PRESS offers a variety of workshops to help you implement PRESS effectively in your school. Workshops can be sequenced throughout the school year to provide ongoing support for school staff. Each workshop is described below. Discounts on PRESS materials (manual and online subscriptions) are offered with all workshops.

New to PRESS? Start with our standard workshops for teachers, interventionists, and instructional coaches.

TIER 1, CLASSWIDE INTERVENTIONS

3 hours (in-person) or 2.5 hours (online)

Learn an efficient process for data teams to analyze screening data and plan supplemental tier 1 supports for whole-class implementation. We introduce a process for examining universal screening data and implementing classwide, tier 1 interventions for classrooms where over half of students have been identified as reading below grade-level benchmarks. This process helps strengthen core instruction and, within a short time frame of ten days, the number of students requiring intervention can be significantly reduced.

TIER 2 INTERVENTIONS & INTRODUCTION TO PROGRESS MONITORING

7 hours (in-person) or two 3-hour sessions (online or in-person)

Learn to target small group interventions using the PRESS data-driven decision making process by identifying students' intervention needs and implementing specific, skill-based interventions from the PRESS Intervention Manual. Consider the components of effective interventions & implementation fidelity. An introduction to continuous progress monitoring is also provided with an emphasis on decision making using ongoing, reliable data collection.

Need continued support with PRESS implementation?

CUSTOMIZED SUPPORT OPTIONS AVAILABLE

Customized professional development options can be created to address your specific needs.

Topics may include:

- Progress monitoring review and extended support using PRESS tier 2 problem solving questionnaire and other resources to make intervention decisions for individual students
- Ongoing guidance and support conducting efficient and effective data team meetings using your student data
- Supporting English learners with PRESS
- Foundations of reading development
- Additional topics and support tailored to your needs
